PROFESSIONAL SUMMARY

Full-Stack Developer with 3+ years of experience building scalable web applications using Angular, React.js, Node.js, and NestJS. Experienced in REST API development, payment gateway integration, cloud deployment, and third-party backend integrations. Worked across healthcare, fintech, restaurant, and real-estate domains with a strong focus on performance, modular architecture, and responsive UI development.

TECHNICAL SKILLS

Frontend: Angular 19/21, React.js, Ionic, HTML5, CSS3, TypeScript, Responsive Design

Backend: Node.js, NestJS, Express.js, REST APIs, JWT Authentication

Database: MongoDB, MySQL

Cloud & Hosting: AWS EC2, Linux VPS, Hostinger, Render

Tools: Git, GitHub, Swagger, Postman, VS Code, Jest

Integrations: PayDart, Telr, Payment Gateways, 3rd-Party APIs

Architecture: MVC, Modular Architecture, Agile / Scrum

PROFESSIONAL EXPERIENCE

Software Developer — Phian Infotech, Nagpur

July 2025 – Present

- Engineered Ayurpiles India healthcare platform using Angular 21, NestJS, and MySQL — streamlining appointment booking across 3+ modules and reducing admin workflow time by 40%.
- Deployed and configured 4+ production applications on Hostinger and Render, achieving consistent uptime with environment-specific backend setup.
- Built Phian Infotech corporate website with dynamic CMS, enabling non-technical staff to independently manage 10+ service listings.
- Expanded Athursday Cafe platform with real-time menu APIs and CMS, cutting manual menu update effort by 70%.
- Delivered a real-estate listing website and Ionic mobile app across 2 platforms, integrating Socket.IO for live location tracking and real-time updates.
- Planned and maintained scalable REST APIs using NestJS and Express.js, supporting 5+ concurrent client-facing projects.

Software Developer — Atina Technology Pvt. Ltd, Nagpur

Feb 2024 – June 2025

- Created a full-stack e-commerce platform using React.js and NestJS — delivering product listing, cart, authentication, and responsive UI for 1,000+ potential users.
- Led backend development for an Emergency Alert System handling 500–5,000 firefighting devices in real time, improving multi-department response coordination.
- Enhanced Angular modules for firefighter workflow management, reducing manual alert handling steps across 3+ user roles.
- Improved NestJS API performance with optimised MySQL and MongoDB-backed workflows, supporting real-time data processing at scale.
- Contributed to 10+ Agile sprint cycles involving code reviews, sprint planning, and CI/CD deployment activities.

Software Developer — ULIS Technology Pvt. Ltd, Nagpur

May 2022 – June 2023

- Integrated secure backend APIs for PayDart and Telr payment gateways, enabling end-to-end transaction processing handling 100+ daily transactions on a fintech client platform.
- Implemented transaction validation, error handling, and payment security workflows — reducing failed transaction rates through robust error recovery logic.

- Managed source control and production deployments for 3+ releases using Git and GitHub, maintaining clean branching and versioning standards.

KEY PROJECTS

Ayurpiles India • Angular 21 • NestJS • MySQL <https://ayurpilesindia.com>

- Healthcare platform with appointment booking, admin dashboard, and third-party backend integration hosted on Hostinger and Render.

Phian Infotech Website • Angular • Node.js • MongoDB <https://www.phianinfotec.com>

- Corporate website with dynamic service showcase, CMS functionality, and responsive layout.

Athursday Cafe • Angular • Node.js • MySQL <https://athursday.com/home>

- Restaurant management platform with CMS, real-time menu management, and fully responsive design.

Vaultstone Real Estate Website & App • Angular • Ionic • Node.js • MongoDB <https://vaultstone.phianinfotec.com/home>

- Real-estate listing platform and APK-based mobile app with Socket.IO for live location tracking and real-time updates; distributed directly to clients.

Emergency Alert System • Angular • NestJS • MySQL (NDA)

- Real-time coordination system managing firefighting devices across multiple departments.

PayDart Payment Gateway • Node.js • Express.js • MySQL (NDA)

- Fintech backend for secure transaction validation and payment processing.

E-Commerce UI Platform • React.js • NestJS • MongoDB <https://ecomui.vercel.app>

- Full-stack e-commerce platform with product listing, authentication, and scalable backend architecture.

EDUCATION

Bachelor of Engineering – Information Technology

Graduated: 2022

VMIT, Nagpur, India

CORE COMPETENCIES

Full-Stack Development • REST API Design • Angular Development • React.js & Frontend UI • NestJS Backend Development • Node.js & Express.js • MongoDB & MySQL • JWT Authentication • Cloud Deployment • Payment Gateway Integration • Linux Server Management • Responsive Web Design • API Integration • Agile / Scrum • Modular Architecture
